

## Management Systems Policy

We as, "Coca-Cola İçecek A.Ş." and "Mahmudiye Kaynak Suyu Ltd. Şti.", base all our implementations on our Management Systems Policy. One of our main goal is to ensure customer and consumer full satisfaction by offering them the highest quality drinks.

In this context, we will meet all the standards set by The Coca-Cola Company as well as complying with all legal, company requirements and other conditions, together with management systems related to quality, occupational health / safety, environment, food safety, and energy. We are committed to take responsibility as all employees, to review and improve our policy, strategies, system, goals and objectives regularly to adapt to global development, by evaluating the risks and opportunities regarding our internal and external issues, and to exceed the expectations of our stakeholders in the relevant parties.

As CCI, we take care of the safety and satisfaction of our employees, which is our most valuable asset. By achieving company targets with the highest quality, lowest cost and sustainable environmental approach; we strive to be the best company that meets employee and consumer demands. We create value in every area that we touch.

We dedicate ourselves to excellence and continuous improvement in all our processes; we always strive to build a preferred, competent organization. For this, we take the process approach as basis, spread the operational excellence culture that encourages continuous improvement in all our processes and systems, and constantly monitor and improve our key performance indicators and provide the resources needed.

We evaluate all aspects of our management systems in all stages and service areas from the entry of the raw material to the delivery of the product to the final consumption point, determine the risks and opportunities, determine the hazards, keep records and control them, follow the technology and apply it to our work with an innovative approach. We derive the strength we need for this from our commitment to continuous improvement, our competent employees who are open to innovations and our effective communication skills that we always prioritize.

### Quality and Food Safety

Achieving company goals with our commitment to meeting the highest quality and food safety requirements; We strive to be the best and most competent company that meets customer and consumer demands.

In addition to taking the necessary measures to ensure that our suppliers, contractors and distributors assume similar obligations, we determine the specifications of the supplied raw materials, ensure their inspection and control.

### Occupational Health and Safety

Safe working style is an integral part of our business.

Complying with the legal requirements on occupational health and safety for our business, our employees, contractors and others in our ecosystem; We are committed to ensuring safe and healthy working conditions in order to eliminate occupational accidents, injuries, impairment of health and occupational diseases.

Our commitment includes providing the necessary resources to support, develop, maintain and communicate occupational health and safety, health / wellness programs and create a healthy and safe work environment.

### Environment – Energy

We are fully committed to the concept of "Responsible Corporate Citizenship". We are pioneers in environmental protection. We use our natural resources in the most efficient way, especially energy and water.

We are committed to preventing pollution, reducing environmental impact and protecting the environment by including our strategies, goals and targets in our annual business plans, within the framework of environmental sustainability and social responsibility, by acting proactive and innovative in the protection of the environment.

With the awareness of our responsibility, we aim to consume less natural resources by utilizing reuse, recycling and renewable energy opportunities for a sustainable future.

We evaluate the suitability of our energy and resources use to our company structure, shape our processes accordingly and design them to increase efficiency.
